

<b>Unit of Study</b>	SOFT3888
<b>Team name</b>	Hand of the Fek
<b>Project Name</b>	Project 23 TechLab knowledge sharing and reporting platform upgrade
<b>Project start date</b>	Monday, 12/08/2019
<b>Project end date</b>	Monday, 28/10/2019
<b>Project point person</b>	Adam Ghanem
<b>Report Date</b>	Sunday 29/09/2019

<b>Quick description</b>	To update the techlabs website to be more accomodating and be able to allow certain groups of users to access and filter material relative to their needs.
--------------------------	--

Status item	Status up to last week	Planned for next week
<b>Scope</b>	<p>Search functional but without tagging</p> <p>Functional search bar that can search for articles but has no tagging ability.</p> <p>Basic WYSIWYG complete. Tagging with search backend queries</p>	<p>Infinite scroll draft,</p> <p>WYSIWYG complete.</p> <p>Admin authentication complete.</p> <p>Routing and navigation across backend linking with frontend.</p> <p>Tagging queries fully functional with backend.</p>
<b>Time</b>	<p>To stay on time the team needed to:</p> <ul style="list-style-type: none"> <li>● Finalise way to represent events.</li> <li>● Build on CSS of the website.</li> <li>● Think of a way to implement wcag2.1 elements into the design of the website.</li> <li>● Come up with mobile phone design</li> </ul>	<p>To stay on the team needs to:</p> <ul style="list-style-type: none"> <li>- Complete the WYSIWYG editor</li> <li>- Routing and navigation</li> <li>- Admin authentication</li> <li>- Database functional and tested.</li> </ul>

<b>Quality</b>	Testing was prioritised this week, with multiple testing jobs being issued to group members.	Testing is still being prioritised to catch up on some missing parts, hopefully the completion of testing for the database, authentication and parts of frontend is complete.
<b>Planned Activities</b>	<p>CSS progression to develop some more CSS for the website</p> <p>Read through wcag2.1 and implement what is required.</p> <p>Talk to clients about progress with design.</p> <p>Implements WYSIWYG editor basic version on articles.</p>	<p>Try to develop a wcag2.1 design or ultimately delay this stretch goal until later.</p> <p>Presentation preparation</p> <p>Online meeting during the break</p> <p>Testing complete</p>
<b>Achievements</b>	wcag2.1 was read through and basic understanding of how it will work but no final design yet.	Complete admin authentication and get decent coverage on testing. Hopefully a good sign would be to complete the WYSIWYG editor.
<b>Major deliverables</b>	<p>Implemented basic WYSIWYG editor version.</p> <p>Implemented basic search functionality.</p>	<p>Complete WYSIWYG editor.</p> <p>Infinite scroll draft with load more button.</p>
<b>Major issues</b>	The WYSIWYG editor has support for embed videos, which cleared up the issue.	Admin authentication is insecure and allows any user to login.
<b>Major risks</b>	Article database is not sufficient for the search queries. However, this has been fixed.	That a wcag2.1 design takes too much time out of development of the main website.
<b>External dependencies</b>	None	None
<b>Estimated effort (h)</b>	15	17
<b>Recorded effort (h)</b>	14	12
<b>Overall Status (RYG)</b>	Green	Green
