

<b>Unit of Study</b>	SOFT3888
<b>Team name</b>	Hand of the Fek
<b>Project Name</b>	Project 23 TechLab knowledge sharing and reporting platform upgrade
<b>Project start date</b>	Monday, 12/08/2019
<b>Project end date</b>	Monday, 28/10/2019
<b>Project point person</b>	Adam Ghanem
<b>Report Date</b>	Saturday 12/10/2019

<b>Quick description</b>	To update the techlabs website to be more accomodating and be able to allow certain groups of users to access and filter material relative to their needs.
--------------------------	--

Status item	Status up to last week	Planned for next week
<b>Scope</b>	<p>Infinite scroll draft,</p> <p>WYSIWYG complete.</p> <p>Admin authentication complete ob backend, need to link with frontend.</p> <p>Routing and navigation across backend linking with frontend in progress.</p> <p>Tagging queries fully functional with backend.</p>	<p>Infinite scroll nearly complete</p> <p>Tagging functionality development on frontend. Work towards querying backend.</p> <p>Advanced search nearly complete</p> <p>Admin authentication progress.</p>
<b>Time</b>	<p>To stay on the team needs to:</p> <ul style="list-style-type: none"> <li>- Complete the WYSIWYG editor</li> <li>- Routing and navigation</li> <li>- Admin authentication</li> </ul>	<p>This week the team has a lot of other responsibilities so if the planned scope for next week is not completed we have accounted for that since we are ahead of schedule.</p> <p>The team must however, keep up testing and make progression with</p>

	- Database functional and tested.	connecting the backend to the frontend.
<b>Quality</b>	Testing is still being prioritised to catch up on some missing parts, hopefully the completion of testing for the database, authentication and parts of frontend is complete.	Testing is moving forward with the frontend but more testing is needed for the backend in order to assure the quality of the system.
<b>Planned Activities</b>	Try to develop a wcag2.1 design or ultimately delay this stretch goal until later.  Presentation preparation  Online meeting during the break  Testing complete	Attempt to implement admin authentication into the website.  Backend testing  Attempt to complete infinite scroll
<b>Achievements</b>	Complete admin authentication and get decent coverage on testing. Hopefully a good sign would be to complete the WYSIWYG editor.	Achievements from last week were not met so it would be great to complete them over this week.
<b>Major deliverables</b>	Complete WYSIWYG editor.  Infinite scroll draft with load more button.	Complete testing for backend. Infinite scroll.
<b>Major issues</b>	Admin authentication is insecure and allows any user to login.	Some issues are being found with the backend as we test, should have prioritised testing earlier.
<b>Major risks</b>	That a wcag2.1 design takes too much time out of development of the main website.	The risk is that the backend has some issue that cannot be found with testing.
<b>External dependencies</b>	None	None
<b>Estimated effort (h)</b>	17	14
<b>Recorded effort (h)</b>	12	12
<b>Overall Status (RYG)</b>	Green	Green
