

Unit of Study	SOFT3888
Team name	Hand of the Fek
Project Name	Project 23 TechLab knowledge sharing and reporting platform upgrade
Project start date	Monday, 12/08/2019
Project end date	Monday, 28/10/2019
Project point person	Adam Ghanem
Report Date	Sunday 15/09/2019

Quick description	To update the techlabs website to be more accomodating and be able to allow certain groups of users to access and filter material relative to their needs.
--------------------------	--

Status item	Status up to last week	Planned for next week
Scope	<p>Navigation with basic buttons complete</p> <p>Search Bar, non functional but UI there.</p> <p>Article Previews available on the main page.</p> <p>Setup ERD and Article Databases Draft complete</p>	<p>Top banner and panel design based on Wix in progress.</p> <p>Navigation updated to fit final design on Wix.</p> <p>Renders article previews and CSS added</p> <p>Search functionality with DB in progress.</p> <p>Article Database complete.</p>
Time	<p>The functionality of search was completed on time with a nice article draft available to view.</p> <p>This means that the project thus far is on schedule.</p>	<p>To stay on time, the main deliverables to meet for next is to:</p> <ul style="list-style-type: none"> - be able to have some basic CSS complete, - top headers/footers matching the Wix design

		<ul style="list-style-type: none"> - have the Article Database complete.
Quality	Tests for the deliverables met for the week have been before actually delivering the product. The coverage report for the Frontend is still passing.	Tests hopefully should be done for the Article Database and the updated navigation before the actual components are implemented.
Planned Activities	Develop navigation and search bar Complete presentation slides Finish Report 1 Code article previews Setup ERD and article databases.	Meet with the tutor to discuss details of report. Discuss final design with UI/UX guru, John El Khoury Antonios Review Report 1 Complete Week 7 Deliverables <ul style="list-style-type: none"> - Top header and footer CSS and design - Progress with search functionality - Article Database Testing for Week 7 Deliverables.
Achievements	Complete the search bar, navigation and database table before the end of Week 6 so work can start on the WYSIWYG editor.	Achievements for this week will be to finish the design and implementation of both an ERD diagram and the Article Database. Also being able to complete the search functionality with the database would be great progress.
Major deliverables	Search bar for articles. Navigation	Have some basic CSS complete (Header and footer CSS) Top headers/footers matching the Wix design Article Database complete.

Major issues	Need to stay on schedule during this time as a lot is due.	Need to fix up Wix design to match updated client requests so we are not implementing something that the client has already changed their minds about.
Major risks	Late deliverable in time for report and presentation.	Backend development falls behind frontend.
External dependencies	None	None
Estimated effort (h)	20	18
Recorded effort (h)	21	18
Overall Status (RYG)	Green	Green

*project status report should be brief but informative – may use dot points where appropriate
